Part C (Answer any 1 question(s). Each carries 14 marks)

8. • Read the passage and answer the following questions

The Influence of Mobile Phones on Children

In recent years, mobile phones have become a central part of children's lives. From playing games and watching videos to socializing with friends and even doing schoolwork, mobile phones offer a vast range of opportunities for learning and entertainment. However, the increasing use of mobile phones among children has raised concerns about their impact on health, social development, and academic performance.

One of the most significant concerns is the effect of excessive screen time on children's physical and mental well-being. Studies have linked prolonged use of mobile phones to issues such as eye strain, poor posture, and disturbed sleep patterns. Additionally, the blue light emitted by screens can interfere with the production of melatonin, a hormone that helps regulate sleep, leading to difficulties falling asleep and maintaining healthy sleep cycles.

The influence of mobile phones on children's social skills is also a topic of debate. While mobile phones allow children to stay connected with friends and family, excessive use can lead to social isolation and a lack of face-to-face interaction. This is particularly true for younger children, who may

struggle to develop important social skills if they rely too heavily on virtual communication.

Academically, mobile phones can be both beneficial and detrimental. On the one hand, they provide access to educational resources, online tutoring, and learning apps. On the other hand, they can be a source of distraction, as children may be tempted to use their phones for entertainment instead of focusing on homework or studying.

To mitigate the negative effects of mobile phone use, experts recommend setting limits on screen time, encouraging outdoor activities, and fostering open communication between children and parents. By balancing the benefits and drawbacks of mobile phones, children can learn to use technology in a healthy and productive way.

Questions:

- 1 What are some of the benefits mobile phones offer to children?
- 2 What are the physical health concerns associated with excessive mobile phone use in children?
- 3 How does mobile phone use affect children's sleep patterns?
- 4 What impact can excessive mobile phone use have on children's social skills?
- 5 How can mobile phones both help and hinder academic performance in children?
- 6 What strategies do experts suggest to limit the negative effects of mobile phone use among children?
- 7 Why is it important to find a balance between the benefits and drawbacks of mobile phone use for children?

7

- Read the passage and answer the following questions.

Literature and Society

Literature, as a reflection of human experience, plays a central role in shaping and reflecting the values, struggles, and ideas of the societies in which it is created. Throughout history, writers have used their craft to both mirror the social realities of their time and challenge them. Works of literature do not exist in a vacuum; they are deeply influenced by the cultural, political, and economic conditions of the world around them.

One of the primary functions of literature is to serve as a window into the human condition. By telling stories about individuals and communities, literature helps readers understand different perspectives, offering insights into the lives of people from different backgrounds, classes, or even time periods. This connection between reader and text fosters empathy, as it allows people to see beyond their own experiences and consider the struggles and triumphs of others.

At the same time, literature often serves as a tool for social critique. Many famous works of literature, from George Orwell's '1984' to Charles Dickens' 'Oliver Twist', were written not just to entertain, but to expose social injustices and challenge established norms. By highlighting the flaws and contradictions in society, these works encourage readers to question the status quo and consider ways in which change might be possible.

First Semester FYUGP Hindi Examination
November 2024 (2024 Admission onwards)
KU1AECHIN103 (SARAL HINDI)
(EXAM DATE : 27-11-2024)
